

BLACKTOWN WOMEN'S & GIRLS' HEALTH CENTRE inc

OUR VISION STATEMENT:

To provide a professional, affordable and wholistic service for women based on feminist philosophy and delivered in a safe environment with an emphasis on promoting health, well-being and empowerment for all women.

As a not for profit women's health centre, we offer a wholistic approach to understanding, managing and supporting women and girls to make decisions about their own health and well being.

Funded almost entirely by the NSW Department of Health we are an incorporated association managed by a committee made up of women who work or live in the Blacktown local government area.

We operate with a social view of health and provide a wholistic approach to health care where the 'whole woman' and her life circumstances are taken into account.

OUR OBJECTIVES INCLUDE:

1. To promote a wide range of accessible services and supports to women and girls that promotes good health and well-being
2. To work with others, try new approaches and increase options for women and girls
3. To ensure efficient, effective and transparent management processes
